

POLYTOUCH® NANO

Nowadays, a self checkout terminal in retail already plays an important role for customers and operators. In the future, solutions for SCO will become even more important. That is why we developed our Polytouch® Nano Mix 'n' Match. Originating from a project we realized for the german grocery retailer EDEKA, we brought all our expertise and knowledge to this project. Especially designed for grocery retail, our Nano embodies sophisticated modularity to be always accessible both now and in future applications. Keeping in mind both requirements of store operators and customers, the design enables an easy integration into every store concept while ensuring a maximum ease of use for everyone.
