# Pyramid Computer and FreeStylus, a Philadelphia based Company, are entering a strategic partnership

*The objective of this cooperation is to offer users an alternative and better experience with safer interactions while keeping the environment in mind. Both companies unite their efforts to restore the consumer confidence regarding touch interaction displays while providing a solution that aims to slowdown the spread of the Corona virus.*

GILBERT, Ariz. (PRWEB) September 24, 2020 -- As the Center for Disease Control stated in March, SARS-CoV-2 virus can stay alive on surfaces for a time. By touching contaminated object or surfaces and then touching their faces, people may acquire SARS-CoV-2. To mitigate the risk, the free stylus aims to slow the spread of the virus by replacing the operation of a device with fingers by operating it with a pen.

Ryan Lagace, COO of Pyramid Computer in North America said:
"As we continue to develop and offer best-in-class technology solutions to the market, we also want to ensure our customers have all the options at their disposal to interact with our kiosks. FreeStylus is an alternative concept solution that enables the user to leverage a recyclable paper stylus to safely interact with the kiosk. Seeing our customers and their needs and react by looking for innovative solutions that enhance their experience with our kiosks in these uncertain times is part of our flexibility at Pyramid Computer."

Scott Wasser, CEO and Founder of FreeStylus:
"We are very excited to be working with Pyramid Computer in the kiosk and self-service industries. We are partnering with them to provide an innovative solution to public touch technology that benefits the users well-being and safety."

FreeStylus has designed/invented the recyclable stylus which can be used on multiple applications that require touch interaction from the public: for example kiosks, ATM's and Payment Readers. The FreeStylus comes with an automatic dispenser that can be mounted on a wall, a table, or freestanding, depending on the customer's requirements. Therefore, Interactions with touch-points are conducted in a safer, more hygienic, and touch-free manner.

Pyramid Computer has focused on the development and manufacture of high performance and tailor-made IT solutions since 1985. The company has produced more than 30,000 customized Polytouch® kiosk terminals for QSR and retail customers throughout the world. In addition, it has developed a uniquely precise system for localization and automation in hospitality and retail – Pyramid Location System (PLS). All products including IT hardware, indoor localization, and Network & Security and Industrial PC & Imaging products are engineered and designed in Germany for shipment and installation via worldwide OEM and distribution partners.
